Services

(Service Area= 60 miles from Detroit Lakes)

Replacing Broken Floe Dock Leg

Floe dock legs are built with a non serviceable, plastic square nut that will strip over time and prevent the leg from being able to adjust. We offer replacement of these legs for \$225 (cheaper than new leg) with the broken leg being exchanged as a core (core charge of \$125 if you would like to hang on to your broken leg).

Dock & Lift Install/Removal List (charged spring/fall)

Docks: \$3/Ft. \$200 minimum.

*\$0.25-0.50/Ft fee for dock install/removals with increased difficulty/danger. Ex). Steep slopes, extreme mucky bottom, wood/steel dock, storing sections far away from shoreline, etc. Lifts are priced on a difficulty basis from Level 1- Level 4
Main Factors: Wheels (stay on or take off?), slope, lake bottom, water depth, weight of lift, method of removal.

Level 1- \$75 - lifts with no canopies.

Level 2- \$100 - lifts with canopies and are easy to remove.

Level 3- \$125 - lifts with canopies that are difficult to

remove.

Level 4- \$150 - lifts that are extremely difficult or dangerous to remove.

By pricing this way we give the customer a way to lower their yearly service fees by making their install/removal go smoother with things such as Smarte Jack wheel kits for their lifts or deciding to store them in a more accessible spot.

This is only to get the lift in/out of the water and leveled. It does not include canopy, battery, or extension cord installation/removal.

Little Lifts

(PWC= Personal Watercraft)

-PWC Lift (with canopy)- \$25 (\$50)

-Double PWC Lifts (with canopy)- \$50 (\$75)

-Mid size lifts for items such as a paddle boat- \$50

-Floating PWC Lifts (double)- \$100 (\$150)
